新年度感染症対策 4/17付

The image is a promotional banner for the 110th issue of Okayama University Medical Research Updates (OU-MRU). It features a central bar chart comparing the number of newly diagnosed children with asthma before and after school closures. The chart shows a significant decrease from 668.74 before school closures to 295.53 after school closures. To the right of the chart is a portrait of Shoko Matsumoto, an assistant professor in the Faculty of Medicine, Okayama University. The banner also includes the title of the research article: 'Decrease in the rate of new asthma diagnoses in children during the COVID-19 pandemic ~ Is there a connection to the decrease in respiratory virus infections due to infection control measures?'. The banner is decorated with various logos of Okayama University and its research centers.
