CARESTAR[®]

The advertisement features a man in a grey jacket and a woman in a yellow jacket standing against a background of flames. The text highlights the jackets' ability to raise body temperature by 1.8°C in one minute through a 'body temperature recycling' process. It also lists five benefits: fire resistance, water repellency, leather-like texture, windproofing, and odor resistance. The brand 'HANTEN' is associated with 'tough&eco' and 'Sorona AGILE' (37% plant-based). A partnership with 'CARESTAR' is also indicated.
